ABOUT ME

Data Scientist in transition from a 5-year operational and management background, now specializing in machine learning, predictive modeling, and data-driven decision-making. Experienced in reviewing and fine-tuning AI-generated code at scale, with hands-on delivery of 4 end-to-end ML projects - from EDA and statistical testing to model deployment via Streamlit. Combining analytical rigor with a full-stack development foundation to build solutions that go beyond the notebook.

TECHNICAL SKILLS

- Machine Learning
- Data Visualization
- Streamlit / Dashboards
- Python (Pandas, NumPy)
- JavaScript / TypeScript
- Statistical Testing
- SQL & NoSQL
- Java (Spring Boot)
- Git / GitHub
- Matplotlib / Seaborn
- React / Tailwind
- Docker / AWS

SOFT SKILLS & LANGUAGES

Soft Skills

- Analytical Thinking
- Problem Solving
- Data Communication
- Fast Learning
- Attention to Detail
- Teamwork

Languages

- Portuguese (Native)
- English (Fluent)
- Spanish (Intermediate)

PROJECTS & CASE STUDIES

Beta Bank - Churn Prediction

Python | Random Forest | Upsampling | Scikit-Learn | Streamlit
[Live App](#) | [Notebook](#) | [GitHub](#)

- Built a classification model on 10,000 records to proactively identify customers at high churn risk.
- Applied upsampling to handle severe class imbalance (~20% churn rate), outperforming class_weight baseline by 4pp.
- Achieved F1-Score of 0.61 (target: >0.59) and AUC-ROC of 0.85; deployed as an interactive Streamlit app.

Megaline - Mobile Plan Recommendation

Python | Random Forest | Decision Tree | Scikit-Learn | Streamlit
[Live App](#) | [Notebook](#) | [GitHub](#)

- Developed a multi-class classification model to recommend the optimal plan (Smart vs Ultra) per subscriber.
- Tuned hyperparameters via systematic grid search across 4 parameters, using a strict train/validation/test split.
- Achieved 79.6% accuracy on unseen data (target: >75%); live app enables real-time subscriber profiling.

OilyGiant - Oil Region Risk Simulation

Python | Linear Regression | Statistical Bootstrapping | NumPy | Streamlit
[Live App](#) | [Notebook](#) | [GitHub](#)

- Built a financial risk framework to evaluate 3 candidate oil regions for 200-well development (\$100M budget).
- Ran 1,000-iteration bootstrap simulation per region, replicating real-world field exploration strategy.
- Identified Region 1 as the only approved option: expected profit ~\$4.73M, risk of loss 1.2% (threshold: <2.5%).

ICE Store - Video Game Sales Strategy

Python | EDA | SciPy (Welch's t-tests) | Matplotlib | Seaborn | Streamlit
[Live App](#) | [Notebook](#) | [GitHub](#)

- Analyzed 35 years of global video game sales to design a data-driven 2017 marketing campaign.
- Identified PS4 & Xbox One as dominant Western platforms; uncovered Japan as a structurally separate market (3DS/RPG).
- Ran two Welch's t-tests: confirmed no rating difference between XOne & PC (p=0.116); significant difference between Action & Sports genres (p=1.83e-14).

EXPERIENCE

Jun 2024 - Jun 2025

Outlier
Remote

AI Trainer & Code Reviewer

- Reviewed 3-4 AI-generated Python and Java scripts per day, ensuring logical correctness, efficiency, and best practices.
- Fine-tuned approximately 5-6 ML models over 12 months using RLHF, improving model output quality and reliability.
- Developed unit tests and structured feedback datasets used directly in LLM training pipelines.
- Identified and corrected systematic reasoning errors in code generation, contributing to measurable model improvement.

Jan 2022 - Dec 2023

Casa Design
Brazil

Administrative Assistant & IT Support

- Automated stock control and reporting workflows using spreadsheet scripting, reducing manual processing time by ~30%.
- Provided Level 1 IT support for hardware and software, maintaining operational continuity for a 10-person team.
- Restructured corporate document management system, reducing file retrieval time by 40%.

Jan 2018 - Dec 2021

LCC
Brazil

Operations Coordinator

- Led all operational workflows for a 5-person cacao trading company, coordinating with farms and B2B partners across Brazil.
- Applied Lean methodologies to supply chain management, reducing operational costs by 15%.
- Built and maintained analytical dashboards to track procurement metrics and support strategic purchasing decisions.

EDUCATION

2022 - Expected 2027

Descomplica Digital University
Remote

Bachelor's Degree in Software Engineering

- Focus on active methodologies, practical projects, and robust software development.
- Core Modules: Data Structures, Software Architecture, Information Security.

Expected Jun 2026

TripleTen

Online Bootcamp

Data Science Bootcamp

- Completed an intensive program focused on Data Science and Machine Learning.
- Executed multiple end-to-end projects solving real-world business problems.

CERTIFICATIONS

2026	Python Fundamentals	DIO.pro
2025	Full-Stack Web Development Bootcamp	Udemy / Dr. Angela Yu
2025	Smart Data Structures	Descomplica
2024	Database Development	Descomplica
2024	Object-Oriented Programming	Descomplica
2023	Santander Bootcamp Java+Angular	Santander / DIO
